

Muhammad Bin Asim

Front End Developer

muhammadasimkk@gmail.com

+92 315 5917512

Islamabad, Pakistan

Available: Immediate

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 3+ years of hands-on experience building responsive, production-grade web interfaces using React and the MERN stack. Proven track record of delivering clean, scalable UI from Figma/design specs, optimizing frontend performance (up to 30%), and collaborating closely with designers and backend teams across AI-integrated and HR tech platforms. Experienced with Tailwind CSS, cross-browser compatibility, and component-driven architecture. Available to join immediately.

TECHNICAL SKILLS

Core: HTML5, CSS3, JavaScript (ES6+), TypeScript
Frameworks: React.js, React Native, Vue.js (familiar), Node.js, Express.js
Styling: Tailwind CSS, CSS Modules, Responsive Design, Cross-Browser Compatibility
Backend / DB: MongoDB, REST APIs, OpenAI API, LLM Integration
Tooling: Git, GitHub, Docker (basic), CI/CD, Agile / Scrum
Bonus: Prompt Engineering, SEO-friendly coding practices, Performance optimization

PROFESSIONAL EXPERIENCE

Junior Software Engineer | Intelligent Learning Machines

Sep 2024 – Jul 2025

IbexVision — AI-Driven Data Processing & Evaluation Platform

- Designed and built React-based frontend interfaces enabling users to interact with real-time AI workflows and system outputs — translating complex UX requirements into clean, functional code.
- Contributed to IbexVision Cortex, an Electron desktop application for executing AI pipelines, owning UI components and user-facing feature delivery end-to-end.
- Implemented responsive, cross-browser-compatible layouts aligned with product designs, ensuring consistent experience across devices.
- Worked on LLM evaluation systems — prompt engineering, response validation, and model behaviour analysis — giving deep familiarity with AI-driven product workflows.
- Designed annotation and preprocessing data pipelines that improved overall workflow efficiency by ~20%.

Full Stack Developer | Hyve HR

Jul 2024 – Mar 2025

- Built and maintained scalable React applications with a focus on modular component architecture and reusable UI — directly converting design specs into production-ready interfaces.
- Improved frontend performance by ~30% through lazy loading, memoization, and refined rendering strategies.
- Integrated REST APIs (Node.js + MongoDB) enabling real-time, data-driven workflows across multiple product modules.
- Ensured full cross-browser compatibility and responsiveness across all delivered features; collaborated daily with designers and backend engineers.

Cofounder | eBay Dropshipping Business

Jul 2025 – Mar 2026

- Co-founded and scaled an e-commerce operation managing 50+ active listings; improved listing conversion rates by ~35% through SEO-optimised copy and structured listing strategies.
- Automated order processing workflows, reducing manual workload by ~40% — demonstrating ownership, initiative, and operational execution.

MERN Stack Developer Intern | Nayatel

Aug 2023 – Sep 2023

- Built full-stack applications using the MERN stack, integrating backend APIs with frontend systems to improve usability and performance.
- Gained hands-on experience with REST API design, version control workflows, and deployment pipelines.

KEY PROJECTS

CardioVision | AI-Based CAD Diagnosis System

- Built a React-based interface to visualise medical AI outputs for coronary artery disease diagnosis, trained on 1,000+ medical reports. Integrated ML predictions into real-time user workflows, making AI insights immediately actionable.

Gymmies | AI Fitness Application — In Progress

- Developing a cross-platform mobile app (React Native, Expo, TypeScript) with a gamified fitness system — workout planning, nutrition tracking, and an LLM-based AI coach delivering personalised recommendations.

EDUCATION

Bachelor of Software Engineering | NUST (MCS), Islamabad

2020 – 2024
